Use less. Spend less. Do more.

ENERGY STAR® Window Air Conditioner - \$30

A majority of the window air conditioners sold in Nebraska are NOT ENERGY STAR® qualified. Why? Customers don't often understand the additional benefits of purchasing these qualified products over the standard models. ENERGY STAR® qualified products meet strict energy efficiency guidelines set by the EPA and DOE.

What does ENERGY STAR® qualified mean to you?

- Window air conditioners that use at least 10% less energy than conventional models.
- Products that often include timers for better temperature control, allowing you to use the minimum amount of energy you need to cool your room.
- After utilizing the EnergyWise incentive of \$30, the additional cost to you in purchasing an ENERGY STAR® qualified model is often returned back to you shortly through the energy savings you can realize.

The process is simple – follow these easy steps:

- Fill out the application on this brochure
- Attach a copy of your purchase receipt for the ENERGY STAR® qualified window air conditioner
- Sign the application
- Send the application to your electric utility provider
- Your utility will either provide you a billing credit or a check
- Please allow several weeks for processing

Incentives valid as of 4-1-09, subject to change without notice, verify current incentive amounts and program information on our website.

ENERGY STAR® Window Air Conditioner - \$30

Incentive Qualifications

Incentives available for new ENERGY STAR® qualified window air conditioners
Program started in April of 2009. In following years, check with your electric utility for program status.
